## REVIEW

**Preparedness & Planning** examines three areas: Process, People and Technology. Since this is the core of your plan, it's important to be very critical when reviewing these questions. If you answered "Yes" to 20 of the 26 questions in this section, your Preparedness & Planning is probably adequate to survive an emergency. Identify and work on the other areas to close the gaps.

**Plan Administration** addresses the need for keeping your plan a living document. If you have a plan that isn't reviewed periodically, information will be out of date and the plan will not be functional. Keeping it current will encourage personnel to use this valuable tool. Answering "Yes" to 5 of the 7 questions, would indicate adequate Plan Administration.

**Training & Implementation** ensures that all employees know how to use the plan and have had the opportunity to practice how they should perform in the event of an emergency. If you answered "Yes" to 4 of the 6 questions, your Training & Implementation is probably adequate to survive an emergency.

Overall, if you were unable to answer "Yes" to at least 25 of the questions presented here, you should consider dedicating some additional resources in the very near future to addressing the weaknesses identified.
